Crisis Stabilization Bed

- Emergency Mental Health (EMH) stabilization bed providers will follow the treatment plan that has been developed in the crisis stabilization plan a 100% of the time.
- EMH stabilization providers will document in writing how they assisted the person in meeting the objectives in the stabilization plan. These notes need to be sent to EMH supervisor within five days of discharge of consumer from stabilization bed.
- EMH stabilization providers will follow the stabilization and safety plan as set up by the case manager/crisis worker. This may include 15 minute safety checks, monitoring of medications, line of sight supervision, etc.
- EMH stabilization providers will call crisis staff/case manager in regards to any medical treatment provided, any contact with law enforcement, or any other incident that occurs. A written report of the incident is required within 24 hours.
- Provider must comply with Emergency Mental Health reporting and training requirements.
